Software Developer | IT Graduate**Profile Summary**

I am a passionate and dedicated software developer with a strong foundation in IT systems, currently pursuing a Diploma in Software Engineering. I am eager to apply my technical skills in a professional IT environment and excel in troubleshooting, system support, and user assistance. I am highly motivated to contribute to IT operations, learn continuously, and grow as a technical professional. My goal is to deliver efficient and scalable IT solutions while providing exceptional first-line support to end-users.

Key Competencies

I have strong skills in technical support and troubleshooting, including diagnosing and resolving hardware, software, and network issues. I have experience in system configuration and maintenance such as installing, configuring, and maintaining operating systems, applications, printers, and scanners. I communicate technical concepts clearly and document solutions effectively. I possess strong problem-solving and analytical skills, work well in team environments, adapt quickly to new technologies, and manage multiple tasks and priorities efficiently.

Career Highlights & Projects

In 2025, I built and deployed a responsive portfolio website using React and Vite, hosted on Netlify. I also developed a full-stack blog platform with Node.js, Express, authentication, and CRUD features. In 2024, I created an AI chatbot using Python NLP libraries to handle basic user queries. I am currently designing a school management system prototype using MySQL to manage student and staff records. I also participated in a 2025 hackathon project called "Community Health Tracker," where I collaborated on backend development and user authentication.

Work Experience

As a self-employed freelance developer from 2025 to the present, I have provided technical support and troubleshooting for web applications and scripts. I documented project issues, solutions, and workflows clearly for clients and peers, collaborated on GitHub projects in team-based environments, applied agile methodologies, and tutored peers in Python and JavaScript.

Education

I am currently pursuing a Diploma in Software Engineering at the Kenya Institute of Software Engineering (2025 – Present), with coursework in software development, web engineering, database systems, and project management. I actively participate in hackathons and coding challenges.

I completed my KCSE at Ndolo Boys High School (2020–2024), where I excelled in Mathematics and Computer Studies and was an ICT club member.

I completed my KCPE at Katulye Primary School (2012 – 2020) and attended Leaders Education Complex for preparatory education (2010 – 2011).

Certifications

Kenya Certificate of Secondary Education (KCSE), Kenya Certificate of Primary Education (KCPE), Git & GitHub Foundations, Python for Beginners, JavaScript Crash Course (FreeCodeCamp), and Fundamentals of Databases.

Extracurricular Activities

I actively participate in coding clubs and developer forums, hackathons, and programming challenges. I volunteer to teach computer literacy to younger learners, write beginner-friendly technical blogs, contribute to open-source projects, and stay updated with IT trends.

Why I'm a Fit for the IT Trainee Role

I am eager to apply my technical skills in a professional IT support environment, have strong foundational knowledge in IT systems, software, and hardware, excellent communication and documentation skills, the ability to learn quickly and adapt, and a strong motivation to grow into a skilled IT professional through hands-on experience and mentorship.
